

Year 10 Content Overview, Term 2, 2024

Subject Name	Description	Assessments
ENGLISH	Motherland -	

COMMERCE	Investing (making informed decisions) ASX Schools Share market Game & Our Economy. Law in Action.	Investment Report
ELECTIVE HISTORY	A History of Crime and Punishment-changing definitions and approaches. Later in the term we will be studying Revolutions through Time.	Research Task & Presentation.
INDUSTRIAL TECHNOLOGY: Engineering	In Term 2 students will be developing their knowledge and understanding of control systems in technologies and links to industry. Students will learn about electronic components and circuits while designing and constructing a Light and Dark Indicator project. They will also experiment with control systems through the interactive Control Studio program.	Students are assessed on:

their prior knowledge. There is a design component to the top of the table where the students create a unique marquetry inlay pattern to the top surface. The process by which they do this further extends their skills as they select from a range of methods to achieve this. There is also an accompanying design and research theory folio extending the students' knowledge on the various types of timber and their properties, improve their communication skills through a variety of drawing techniques and their
